

Short description

The BPS 203-client software is used to control the BPS 203 Burst Power Station and thereby the connected probe. The software is installed on the user PC.

- automatic configuration of the user interface each time the probe is changed
- automatic detection and configuration of BPS 203
- display of hardware data (BPS 203 + connected probe)

Technical parameters

System requirements	
Operating system	Windows XP with SP3 or above
Interface	USB
HD space	20 MB
Processor	Pentium III 500 MHz
Memory	128 MB
