

Short description

The digital microscope camera is an essential part of a Langer-Scanner and makes it easier to position the near-field probes above the DUT.

The microscope camera is controlled by ChipScan-Scanner software.

Technical parameters

| | |
|-------------------------------|--|
| Sensor | 2.0 Megapixels CMOS |
| Resolution Still Image | 1600 x 1200 pixels |
| Image file format | BMP |
| Video Resolution | 1600 x 1200 pixels |
| Video file format | AVI |
| Frame Rate | 20 FPS (VGA) |
| Focal distance | 5 mm - infinity (when focal distance is infinity, the microscope camera can't magnify) |
| Sizes | 7.2 mm in diameter and 160 mm in length |
