

Short description

The GND 25 ground plane ensures the RF-compatible contacting of the probe during an EMC measurement at a test IC. The GND 25 consists of steel with a gold plated surface. The recess (103 mm x 103 mm) is designed for the placement of GNDA ground adapters (GNDA 01-04) and TEM cell prints (100 mm x 100 mm).

The CB 0708 connection board is placed into the underside of the ground plane. On the ground plane there are three openings for LEDs.

Technical parameters

| | |
|---------------------|----------------|
| Height | 24 mm |
| Depth of the recess | 1.7 mm |
| Diameter | 218 mm |
| Opening | (103 x 103) mm |
| Weight | 2 kg |
